

About the Authors

David Kuncicky (*kuncick@eng.fsu.edu*) is the Director of Computing and Multimedia Services for the FAMU-FSU College of Engineering. He also serves as a faculty member in the Department of Electrical Engineering and as a courtesy professor in the Department of Computer Science. He has taught computer science and computer engineering courses for the past 15 years and has published research in the areas of intelligent hybrid systems and neural networks. He is actively involved in the education of computer and network system administrators.

Bruce Alan Wynn (*wynn@colltech.com*) serves as the Training and Certification Manager at Collective Technologies, a technical consulting firm, where he is responsible for designing and implementing the technical curriculum for their consultants. He holds BS degrees in physics, mathematics, and computer science, an MS in computer science, and an MBA. He has been involved as a private tutor, instructor, and curriculum developer since 1981.
